Phil Collins

Abstract

Philip David Charles "Phil" Collins, LVO (born 30 January 1951) is an English musician, singer-songwriter, multi-instrumentalist, actor and writer, best known both as drummer and vocalist for rock group Genesis and as a solo artist. He sang the lead vocals on dozens of hit albums and singles in the UK and the US between 1976 and 2010, either as a solo artist or with Genesis. His solo singles, sometimes dealing with lost love and often featuring his distinctive gated reverb drum sound, ranged from the atmospheric "In the Air Tonight", dance-rock of "Sussudio", piano-driven power ballad "Against All Odds", to the political and religious connotations of "Another Day in Paradise". AllMusic has described Collins as "one of the most successful pop and adult contemporary singers of the '80s and beyond." Collins joined Genesis in 1970 as the group's drummer and became their vocalist in 1975 following the departure of their original frontman Peter Gabriel. His solo career, which was launched in 1981 and was heavily influenced by his personal life and soul music, brought both himself and Genesis greater commercial success. Collins's total worldwide sales as a solo artist are 150 million. Collins has won numerous music awards throughout his career, including seven Grammy Awards, six Brit Awards—winning Best British Male three times, three American Music Awards, an Academy Award, two Golden Globe Awards and a Disney Legend Award in 2002 for his solo work. He received a star on the Hollywood Walk of Fame in 1999, was inducted into the Songwriters Hall of Fame in 2003, and into the Rock

Abstract

Rancid is an American punk rock band formed in Berkeley, California, in 1991. Founded by punk veterans Tim Armstrong and Matt Freeman, who previously played in the highly influential ska punk band Operation Ivy, Rancid is credited—along with Green Day, The Offspring, and Social Distortion—for reviving mainstream interest in punk rock in the United States during the mid-1990s. Unlike many of their contemporaries, however, Rancid remained on an independent record label and retained much of its original fan-base, most of which was connected to its underground roots. Rancid includes Tim Armstrong on guitar and vocals, Matt Freeman on bass and vocals, Lars Frederiksen on guitar and vocals, and Branden Steiner on drums. The band was formed by Armstrong, Freeman, and former drummer Brett Reed. Reed left the band in 2006 and was replaced by Steinecker. Frederiksen joined Rancid in 1999 when the band was searching for a second guitar player. To date, Rancid has released 11 studio albums, one split album, one compilation, two extended plays, and a series of live and online-only albums, and has been featured on a number of compilation albums. The band has independently sold over four million records worldwide, making it one of the most successful independent punk groups of all time. The band rose to fame in 1994 with its second studio album, Let's Go, featuring the single "Salvation". In the following year, Rancid released its highly successful album ...And Out Come the Wolves, which produced its best-known songs "Roots Radicals", "Ruby Soho" and "Time Bomb", and was certified gold and platinum by RIAA, selling over one million copies in the United States alone. Its next four albums, Life Wasted, Rancid, Indestructible and Let the Dominoes Fall, were also critically acclaimed, though not as successful as ...And Out Come the Wolves. Rancid is currently recording their eighth studio album Honor Is All We Know, which is expected to be released in 2014.

Abstract

The University of California, Berkeley (also referred to as UC Berkeley; Berkeley California; or simply Cal), is a public research university located in Berkeley, California. The university occupies 1,232 acres (499 ha) on the eastern side San Francisco Bay with the central campus resting on 178 acres (72 ha). Berkeley is the flagship institution of the 10 campus University of California system and of only two UC campuses operating on a semester calendar, the other being Merced. Established in 1868 as the result of the merger of the private College of California and the public Agricultural, Mining, and Mechanical Arts College in Oakland, Berkeley is the oldest institution in the UC system and offers approximately 350 undergraduate and graduate degree programs in a wide of disciplines. Berkeley has been charged with providing both "classical" and "practical" education for the state's people. Berkeley co-manages three United States Department of Energy National Laboratories, including the Los Alamos National Laboratory, Lawrence Livermore National Laboratory and Lawrence Berkeley National Laboratory for the U.S. Department of Energy. Berkeley faculty alumni, and researchers have won 72 Nobel Prizes (including 30 alumni Nobel laureates), 9 Wolf Prizes, 7 Fields Medals, 15 Turing Awards, 45 MacArthur Fellowships, 20 Academy Awards, and 11 Pulitzer Prizes. To date, UC Berkeley its researchers are associated with 6 chemical elements of the periodic table (californium, seaborgium, berkelium, einsteinium, fermium, lawrencium) and Berkeley Lab has discovered 16 chemical elements in total - more than any other university in the world. Berkeley is a founding member of the Association of American Universities and continues to have very high research activity with million in research and development expenditures in 2009. Abstract

Miami (/maɪˈæmi/; Spanish pronunciation: [maiˈami]) is a city located on the Atlantic coast in southeastern Florida and the county seat of Miami-Dade County. The 42nd largest city proper in the United States, with a population of 419,777, it is the principal, central, and most populous city of the Miami metropolitan area, and the most populous metropolis in the Southeastern United States after Washington, D.C. According to the U.S. Census Bureau, Miami's metro area is the eighth most populous and fourth-largest urban area in the United States, with a population of around 5.5 million. Miami is a major center and a leader in finance, commerce, culture, media, entertainment, the arts, and international trade. In 2012, Miami was classified as an Alpha- World City in the World Cities Study Group's inventory. In 2010, Miami ranked seventh in the United States in terms of finance, commerce, culture, entertainment, fashion, education, and other sectors. It ranked thirty-third among global cities. In 2008, Forbes magazine ranked Miami "America's Cleanest City", for its year-round good air quality, vast green spaces, clean drinking water, clean streets and city-wide recycling programs. According to a 2009 UBS study of 73 world cities, Miami was ranked as the richest city in the United States, and the world's fifth-richest city in terms of purchasing power. Miami is nicknamed the "Capital of Latin America", is the second largest U.S. city with
